Deliver business plans and technical assistance

DIFFERENTIATORS & CERTIFICATIONS

CedarBridge brings nationally-recognized health IT and policy experts to each engagement, customizing our approach to our clients' needs, priorities, and unique cultures.

We work with state and federal governments nationwide to execute policies and programs for Medicaid, public health, and state innovation departments.

The highly-experienced CedarBridge team has supported private sector healthcare delivery systems' initiatives to meet their strategic objectives through health IT.

CedarBridge is a woman-owned, certified SBA 8(a) business.

PAST PERFORMANCE

Office of the National Coordinator for Health IT

“Patient Identification and Matching” report (Coauthor, 2014); “Health Information Technology Infrastructure to Support Accountable Care Arrangements” (Author, 2015); “ONC Exemplar HIE Governance Program” report (Coauthor, 2014)

Connecticut Office of Health IT & Health IT Advisory Council

Provided health IT and HIE planning and strategic support including: facilitation and support for the Health IT Advisory Council, a comprehensive environmental scan, ongoing stakeholder engagement activities, and the planning and execution of multi-stakeholder design groups on electronic clinical quality measure and reporting system design, immunization information system design, and HIE use cases. CedarBridge also supported the operations plan for the Connecticut State Innovation Model Test Award and led the development of an update to the state’s HITECH 90/10 IAPD.

North Dakota Health Information Network (NDHIN)

Provided the NDHIN’s executive leadership and Health IT Advisory Committee with strategic and tactical business planning support, including a comprehensive stakeholder engagement initiative, a Five-year Business Plan, a large, multi-year HITECH 90/10 IAPD funding request, and provided the North Dakota Medicaid agency with State Medicaid Health IT Plan updates.

Intel Corporation

Provided project management, strategic consulting, and subject matter expertise for Intel’s Connected Care initiative – a value-based health benefit plan for employees and dependents. Over a period of four years, CedarBridge Group worked directly with Intel’s care delivery partners to design inter-organizational care coordination workflows, and implement interoperability solutions and measurement instruments in support of the accountable care offering.

ONC Move Health Data Forward Challenge

As a finalist in the Office of the National Coordinator for Health Information Technology’s Move Health Data Forward Challenge, CedarBridge Group built and successfully piloted the CareApprove™ consent management solution, collaborating with psychologists to recruit clients that used the smartphone app to send depression screening assessments to their primary care providers’ EHR.

New England States Consortium Systems Organization (NESCSO)

CedarBridge Group provided subject matter expertise on health IT, clinical quality measures, and state procurement strategies to the Rhode Island Executive Office of Health and Human Services.
